

KAMANURU PRAVEENA

Data Analyst

+91 6305850985 | praveena06062006@gmail.com | Kadapa, Andhra Pradesh | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Data Analyst skilled in SQL, Power BI, Python, and Excel, with hands-on experience building interactive KPI dashboards and analyzing 500K+ transaction records across e-commerce, retail, and foodtech to surface actionable business insights. B.Tech CSE student (CGPA: 9.49/10, 2023–2027) with a track record of translating complex analysis into clear, decision-ready recommendations for business stakeholders.

WORK EXPERIENCE

Power BI Data Analyst Intern — Microsoft Elevate Program (Remote)

Feb 2026 – Mar 2026

- Designed interactive Power BI dashboards using Power Query and DAX to surface KPIs and business trends, enabling faster and more informed decisions for stakeholders across departments.
- Cleaned and modelled raw datasets to ensure report accuracy; built data models and presented dashboard findings to program mentors, translating complex technical analysis into clear, business recommendations.

PROJECTS

Retail Business Performance & Profitability Analysis [\[GitHub\]](#)

- Cleaned and analyzed 512K+ real e-commerce transactions in MySQL and then built a 3-page interactive Power BI dashboard featuring RFM segmentation, Pareto analysis, and cancellation impact tracking.
- Key findings:** £9.56M revenue analyzed · top 20% of customers drive 73.4% of revenue · 16.6% cancellation rate (£247K lost) · 66.5% repeat purchase rate.

Tech Stack: MYSQL, Power BI, CTEs, DAX, Window Functions(PERCENT_RANK,NTILE), Joins, SQL Views

E-Commerce Customer Churn Analysis [\[GitHub\]](#)

- Processed and analyzed 10,000+ customer transaction records to segment high-churn-risk cohorts by purchase frequency, recency, and average order value — identifying key retention levers.
- Built a dynamic Excel analytics dashboard with Pivot Tables, Slicers, and Conditional Formatting.

Tech Stack: Excel (Pivot Tables, Slicers, Charts, Conditional Formatting), Python, Pandas

Zomato Restaurant Data Analysis [\[GitHub\]](#)

- Explored 50,000+ restaurant records to derive actionable insights on pricing strategy, cuisine popularity, and city-wise customer rating distribution — revealing high-opportunity market segments for business expansion.

Tech Stack: Python, Pandas, NumPy, Matplotlib, Seaborn

CERTIFICATIONS

- Data Analytics Job Simulation — **Deloitte Australia**
- Python Basics for Data Science — **IBM**
- Analyzing Data with Python — **IBM**
- SQL Gold Badge — **HackerRank**

EDUCATION

B.Tech in Computer Science — RGUKT RK Valley
(Rajiv Gandhi University of Knowledge Technologies)
Pre-University Course (PUC) — RGUKT RK Valley

2023 – 2027 | **CGPA: 9.49/10**

2021 – 2023 | **CGPA: 10.0/10**

SKILLS

Analytics & BI: Power BI, DAX, Power Query, Excel (Pivot Tables, VLOOKUP, Slicers, Charts), MYSQL(Joins, Window Functions, CTE's)

Languages & Libraries: Python, Java, C, Pandas, NumPy, Matplotlib, Seaborn

Tools: Git,Github,Jupyter Notebook,VSCode

Core Skills: Data Analysis, Data Visualization, Data Cleaning, KPI Reporting, Business Insight Communication
